# Masterclass Workshop

## Minimally-Invasive Upper GI Surgery

University Medical Center Mainz, Germany  
July 6 to 7, 2023

## **Dear colleagues and surgeons,**

Over the past years advanced surgical techniques for minimally-invasive gastric and esophageal surgery were developed. New surgical strategies and technological innovations brought the upper-GI cancer surgery to the highest level. In Mainz the fully minimally-invasive esophageal surgery is the standard procedure beside robotic procedures as well as minimally-invasive gastric cancer surgery.

In this masterclass workshop we would like to show essential technical steps in minimally-invasive upper GI surgery. We hope to welcome you soon.

Kind regards,

Peter Grimminger and Felix Berlth
